

MANDEEP SINGH

WordPress Plugin Developer | PHP Developer

+917814030215 @ deep7197@gmail.com Rajpura, Punjab

SUMMARY

I'm a **WordPress and PHP developer** with experience building custom plugins, Elementor widgets, Divi modules, Gutenberg blocks, REST APIs, and web applications. My technical strengths include **PHP/OOP, WordPress hooks and APIs, custom plugin architecture, Elementor and Divi development, Gutenberg/block development, MySQL database integration, JavaScript/jQuery, React.js, Laravel, TypeScript, and third-party API integrations**. I also have experience with **AI chatbot integrations, event management systems, responsive UI development, and performance-focused solutions**. I enjoy solving complex problems, learning new technologies, and building scalable, user-friendly applications.

EXPERIENCE

Senior Web Developer

Erginous Technologies 09/2025 - 09/2026 Rajpura, India

- Developed and maintained PHP APIs for mobile applications, supporting multiple features and business workflows.
- Developed meeting management modules to improve user interaction and workflow efficiency across web applications.
- Developed backend APIs and web application features for Vadi, an AI-powered meeting intelligence platform supporting recording, transcription, AI-generated summaries, searchable insights, cloud storage integration, and real-time processing.
- Contributed to the Complaints Management module of the OzStaff system.
- Integrated and enhanced AI chatbot functionality for the Inovcares platform.
- Developed session creation and preview report features for reporting systems.
- Worked on AI-driven data processing and management features.

WordPress Plugin Developer

CoolPlugins 08/2023 - 07/2025 Mohali, Punjab

- Developed custom addons and extensions for popular page builders, including Elementor and Divi.
- Created custom widgets for Elementor and custom modules for Divi with responsive and user-friendly designs.
- Worked on event management plugins, adding and maintaining features for event handling and scheduling.
- Built and maintained custom WordPress plugins with a focus on performance, scalability, and reusable code.
- Experienced in WordPress hooks, REST APIs, AJAX, custom post types, settings APIs, and plugin customization.
- Integrated chatbot functionalities and developed custom Gutenberg/block-based plugins for WordPress websites.

More Projects

- Contributed to LC HoverPeek, LC Kit for Elementor, MS Gallery for Divi, Botisst AI Chat Assistant, and Blockive Premium Addon, building custom WordPress plugins, Elementor widgets, Divi modules, Gutenberg blocks, AI/API integrations, responsive controls, and advanced editor functionality.

Support Agent	

EDUCATION

B. Com.

Punjabi University

08/2015 - 05/2018 Patiala, Punjab

LANGUAGES

English	Proficient	●●●●●
Hindi	Native	●●●●●
Punjabi	Native	●●●●●

INTERNSHIP

PHP Full Stack

Completed 6 months of intensive training in PHP and Full Stack Development, gaining hands-on experience in building web applications using HTML, CSS, JavaScript, and Bootstrap for frontend development, along with Core PHP and MySQL for backend development. Worked with the Laravel framework to develop dynamic applications, implemented REST API integrations, performed CRUD operations, and learned fundamental deployment and web application development practices.
